Exhaust Diagrams **P.1**

Suggestions **P.2**

ISSUE 5

June 15, 2011

Key Factoids:

The rearview mirror was first used at the inaugural running of the Indy 500 race by the eventual winner: Ray Harroun.

The USA has the most cars / capita. According to the latest numbers there are 765 cars for every 1,000 people.

Most American car horns beep in the key of F.

Private Sector jobs grew by 83,000 in May. Overall job growth was only 54,000.

Exhaust Diagrams

Manufacturer exhaust diagrams are one of the key features provided through the Internet AutoParts (IAP) catalog. These exploded views are a handy reference for the Service Dealer. If the Service Dealer looks up Exhaust parts via the Catalog, then once on a Parts List Page, they simply need to be see that a diagram is available. In the example below, the Parts List page is showing that there is a Walker Diagram available:

Status	Labor	Description	Mfg / Part #	Years	Warr.	List	Cost	Extend	Inquire	Q
		WALKER EXHAUST								
		[120",139",157" WB - EXC LIGHTNING & SUPER CREW]								
		Catalog Diagram #	WM827							
		2 1/2 Inch Heavy Duty Clamp	WAL 35337	01-04		4.31	1.99	3.98		2

Note that this is shown at the top of the Walker Manufacturing Line. If the Service Dealer clicks on the Catalog Diagram link (notice that it is underlined), the system will open a new window with that diagram in it. In this example, the vehicle is a 2002 Ford F-150 Pick Up, V8-330 5.4L SOHC. The diagram is shown on the following page.

At the right are several exhaust diagrams for illustration purposes only. The first one is the result of the search on the Ford F-150 V8. The second one is from a 2000 Lexus RX 300, and the last one is from a GMC G1500 V8, which is showing an AP Exhaust Diagram.

Technical Tip

Q: Is it possible to not display parts that do not have pricing or availability at the parts store?

A: Yes! At the bottom of the Parts List page is a "Filter" button. When pressed it will only show parts that have pricing or availability at the part store or part store network. After it is pressed, it changes to "No Filter", which when clicked returns to showing all parts that are in the Stores Display.

Suggestions

As mentioned in previous newsletters, IAP is looking for suggestions from both the Distributor and the Service Dealer. Please use the following email address to send them to:
